HBDJF Series of Angle Check Valves(OPW Type)

HBDJF Series of Angle Check Valves are installed on suction system, fuel lines on top of fuel storage tank. Models are available with Female threaded inlets for connection directly into tank bung fittings. Single-poppet models can be used in applications where the valve is easily accessible for maintenance and disc cleaning or replacement. The HBDJF features a spring-loaded poppet and Buna-N discs to assist in keeping the valve closed when installed in high-vibration areas. It is recommended for use on suction lines where the pressure does not exceed 34 ft of head (approximately 15 psi.). Quality is 100% Factory Tested.
