

High-Accuracy Mechanical Aluminum Flow Meter for Non-Commercial Fuel Measurement

They are 4 digits aluminum mechanical flowmeters are to measure the exact quantity of the dispensed fuel. They are designed for noncommercial use only. These flow meters are reliable, easy to install and simple to calibrate on the workplace. Aluminum metering chamber, 1"/1.5"/2" thread connection, mechanical readout device with rotating wheels. The 4-digit subtotals can be set to zero, while the 8 digitals total readouts can not.

Technical Specification:

Model No	999		
Body Material	Aluminum		
Accuracy	±1%		
Flow Range	20-120L/min		
Inlet/Outlet	1"	1.5"	2"
