

**WWM-25Q Series Aluminum Electronic Presetable Waist Wheel Flow Meter
(Pump-Controlled Liquid Measurement)**

WWM-25Q Electronic Waist Wheel Flow Meter is designed for working together with our electric transfer pumps, with voltage DC12V, DC24V, and AC220V. One wire connecting the pump, to control pump to start or stop working, the other wire to get power supply according to pump voltage. The LCD display shows unit price, amount and liters. To operate the keyboard, you can set the unit price, and preset the desired volume or amount, once the wanted volume or amount dispensed, the pump will stop working automatically. **(It can be used for liquid of Ad-blue)**

Technical Specification:

Model No	WWM-25Q
Body Material	Aluminum
Accuracy	±0.5%
Flow Range	20-120L/min
Inlet/Outlet	1"
