

OGM-II High-Precision Oval Gear Flow Meter – Industrial Liquid Measurement

OGM-II Series of Oval Gear Flow Meters which featured in high accuracy, low pressure loss, small volume, and easy installation, is for different viscosity liquid, such as fuel oil, lubricating oil. It can installed with nozzle for fuel transfer measurement as well as with pulse output to other equipment.

Compact size, easy maintenance.

pulser output for option

Horizontally and vertically flexibility of installation options

Technical Specification:

Model No	OGM-II
Size	3/4", 1"
Flow range	20-100lpm
Accuracy	±0.5%
Max pressure	150PSI
